The longitude is defined by the Greenwich meridian. Positions are shown in degrees, minutes and decimals of minutes. Directions are in true course and directions to lights are given from the sea (from the ship to the light). Heights and depths are given in meters (m), distances in nautical miles (nm) or in meters (m). The title of the EfS may contain the following abbreviations: P = preliminary notice or T = temporary notice. A \* indicates that the notice is based on original information.
